Vent-6 Day-to-day natural ventilation control panel

Simple window actuator/vent control for daily natural ventilation projects, with integrated switch

- e 24V, 6A panel with integrated switch on fascia
- e Ideal for natural ventilation applications
- e Exclusively available from Easivent

The Vent-6 control panel has been specially designed to meet the requirements of natural daily ventilation systems, offer window actuator/vent control without the engineering requirements of more complex smoke control operations.

The panel comes complete with a 24V reverse polarity output and inputs for daily ventilation switches, thermostats and wind & rain sensors. The innovative design provides a programmable facility (via DIP switches) for limited ventilation and timed openings. Supplied in a metal enclosure rated to IP20.

Technical data

Product ref:	ST4 4033
Input voltage:	230 V AC / 50 Hz
Output voltage:	24V DC smoothed, stabilized
Max current load:	6.0A
Housing:	Steel panel (RAL 9010)
Power supply:	According to EN 12101-10
Operating temp:	From -5°C to +40°C
Connections:	Vent switches (type DT, ST), heat detector (type TH 70 Ö, TH 4860) wind & rain detector (type WTS-892, WT-890)

Rain Detector
A3 4566

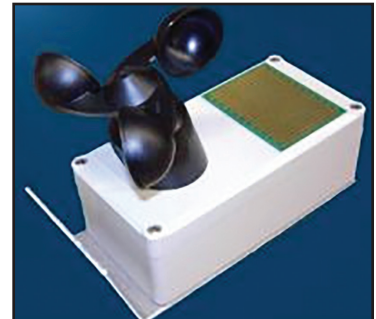

Our rain detector can ensure vents are closed to protect interiors from wet weather.

Voltage: 24volts
Current: 110mA (when triggering)
Dims: 190 x 80 x 62mm
Weight: 0.4kg

Check out easivent.co.uk or call 0870 240 6460 for assistance.

Wind & Rain Detector
A3 4568

For further protection, our wind and rain detector can ensure vents close in poor weather.

Voltage: 24volts
Current: 110mA (when triggering)
Dims: 190 x 100 x 150mm
Weight: 0.5kg
